

Who we are

IAM Tech is a specialist Identity and Access Management consultancy. We scope every engagement with senior leadership — CISOs, CTOs, and CIOs — so it's accountable from day one, then deliver it hands-on with your IT and security teams, from strategy through day-to-day operations. Vendor-neutral, hands-on, and senior-led throughout.

What we do

- ✓ Strategy & Identity Acceleration
- ✓ Request for Proposal (RFP) & Vendor Selection
- ✓ IAM Platform Health Check
- ✓ Legacy Modernisation & Cloud Migration
- ✓ Access Governance
- ✓ Privileged Access Management (PAM)
- ✓ Cloud Governance
- ✓ Access Management & Expert Support
- ✓ Specialist IAM Testing & Business Analysis
- ✓ Compliance & Audit Readiness
- ✓ AI-Driven Threat Detection & Response (ITDR)
- ✓ Non-Human & Agentic Identity Governance

Why IAM Tech

- ✓ Vendor-neutral — we don't resell platforms, so recommendations aren't shaped by a licence margin
- ✓ Hands-on delivery, not just advice — the team that designs it is available to build it
- ✓ Senior-led, never a solo act — a vetted bench of BAs, testers, and developers scales with the work
- ✓ Expert-level support, not a vendor ticket queue — from the specialists who built your programme

Our approach

1 Discover

Map the identity landscape
and where risk sits

2 Design

Target architecture and a
phased roadmap

3 Deploy

Hands-on implementation, not
a hand-off

4 Sustain

Managed support so controls
don't decay

Industries we work in

Financial Services

Aviation & Travel

Retail

Insurance

Manufacturing

Telecommunications

Healthcare

Public Sector

Let's talk about identity.
